6 reasons to choose Steel-Line

See which door suits your home with our online visualiser

Opposite: Custom Western Red Cedar Barn Style Sectional Door.

Strong and durable, Steel-Line garage doors are made in Australia for the harsh Australian conditions.

Steel-Line supports Australian jobs which is why our garage doors are predominately made with the highest quality Australian BlueScope® steel.

A trusted Australian brand, Steel-Line have been making garage doors for Australians by Australians for over 45 years.

Award-winning FingerProof™ Safety design is a standard feature for Steel-Line Sectional Doors.

Every garage door is custom made and manufactured to your requirements. It's one of the reasons the majority of Australia's major builders choose Steel-Line Garage Doors.

Steel-Line offer a full range of Home Enhancer's to suit your personal needs. View our range from page 63.

The garage door more Australians come home to every day.

Steel-Line have been makers and inventors of garage doors in Australia for over 45 years.

Strong, safe and durable, we make with passion to enhance your lifestyle. It's at the core of what we do.

Our award-winning doors are the preferred choice for most major Australian builders.

Every door is custom manufactured for your home.

Above: Two Slimline Sectional Garage Doors in DecoWood® Ironbark.

simply safer

Greater access for family and friends no matter where you are in the world.

Face Fixed Door.

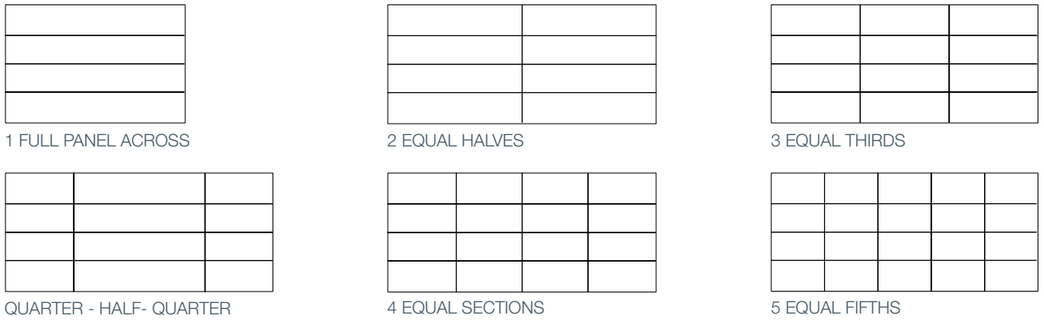

Custom Collection Face Fixed Aluminium Frame Garage Door with Aluminium Composite panels in White

Face Fixed Aluminium Frame Selection

The face fixed design is laying the aluminium composite panels over the frame for that architectural look. The aluminium composite panels are the premier choice for an exterior cladding that will maximise the beauty of the structure while providing a sustainable product to prolong the life of the building.

Despite being conveniently lightweight, these aluminium composite panels certainly aren't pushovers. They have impressive durability and strength, making them well suited to bearing the tough conditions of the Australian climate. Our face fixed design is lightweight, weather-resistant, has a maximum wind rating of C3 for wind regions C and D in Australia.

DecoWood® Aluminium Vertical Battens in Curly Birch

Custom Collection Sectional Door in Barn Style Western Red Cedar

Batten Sectional Garage Door

Batten Sectional Doors are a modern, functional and aesthetically appealing type of garage door designed with horizontal or vertical battens (or "slats") that create a distinctive, contemporary look. These doors are commonly used for both residential and commercial properties, combining the benefits of a Sectional Door system with the stylish and sleek appearance of batten cladding.

The slats or battens can be made from various materials, including timber or aluminum, and are typically spaced to create a visually appealing pattern. With various materials and colour options available, you can create a door that complements your specific design preferences, from natural woodgrain finishes to solid, neutral colours.

Sectional Door

Low maintenance

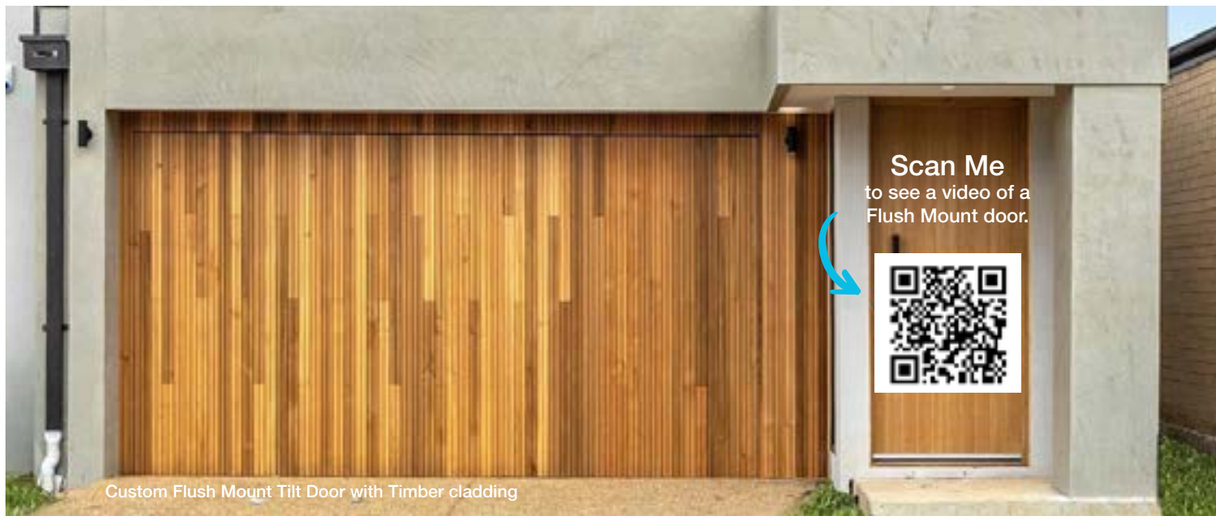

Custom Flush Mount Sectional Door with Knotwood cladding

Flush Mount Selection

Steel-Line's Flush Mount Garage Door blends in your façade with the cladding of your choice to create a seamless appearance to the front of your home. Flush finish means the surface of the garage door and the external wall surrounding it are on the same plane.

The Flush Mount Garage Doors are suitable to take a total weight of up to 175kg for Tilt Doors, and 250kg for Sectional Doors. They can be clad with the building's exterior materials, including timbers, composite timbers, metal, aluminium composite panel and acrylic. The integrated cladding materials make the door appear to be part of the building's wall system. Our Flush Mount Doors are perfect for an architecturally designed building giving the exterior cladding a continuous look and essentially making the door invisible.

NOTE: All Flush Mount Garage Doors are made to order. Select a cladding material from our range or order as frame only and get your builder to clad on site to match the rest of your façade for that invisible look.

Colorbond® Roller Doors

Our range of Colorbond® colours and smooth operation, Steel-Line Roller Doors become true design features of your home.

Manufactured with heavy duty bottom rails containing durable PVC weather seals, a Steel-Line Roller Door provides your precious garage contents with excellent protection from the harsh elements.

All Steel-Line Garage Doors revolve on precision-made drum wheels. Garage doors are counter-balanced using helical coil springs to ensure perfect balance and operation. All our springs are heat treated and tempered to give years of trouble free operation.

“AA” series residential door and “B” series light industrial doors are now supplied with Aluminium guides as standard.

Aluminium guide benefits include:

- Lightweight
- Aesthetically appealing
- Smooth and quiet operation
- Effortless installation

The new Aluminium guide can be fitted with an optional brush seal, adding a level of protection against smoke, draughts, salt, light, dust, insects and bushfire embers.

Tilt Doors

Not enough room in your garage for a Sectional or Roller Door? A lot of older garages can be quite limited in space.

Steel-Line Tilt Garage Doors offer the perfect solution for smaller garages or spaces with restricted side or head room. Manufactured to fit most garage openings and easily installed, the Tilt Garage Door offers safety and convenience in a wide range of colours and materials.

The choices of material is almost as varied as your imagination allows and commonly includes plywood and moulding, K-panel, Colorbond®, Western Red Cedar, aluminium composite panels, copper sheeting, clear or textured glass/ acrylic, and many other types of cladding.

NOTE: Not all options available in all markets. Please refer to your Product Consultant for our wide variety of design options in your area.

Louvre Garage Door in Dulux Classic Pearl White Gloss colour

Louvre Doors

Steel-Line's Aluminium Louvre Sectional Garage Door has been developed to give a high level of airflow and natural light transmission.

Steel-Line sets a new benchmark for Louvre Garage Doors. Designed and manufactured in Australia, our Louvre Garage Door is extremely strong and secure with a modern architectural look. It's ability to provide privacy for what is inside and still allow a minimum 22% ventilation, makes this the door of choice for many modern developments.

Steel-Line Louvre Garage Doors have been engineered to the highest standard and tested at the JCU Cyclone Testing Station against the wind loading requirements of AS/NZS 4505-2012 (also available for C2 & C3).

Aluminium Frame Door

Independently tested

The Timber Look Series

Your garage door is often the largest and most prominent frontal feature of your home. For this reason, choosing the right garage door is a crucial decision that can significantly influence the value and aesthetics of your most prized asset.

If you like the natural look and warmth that wood conveys, we can offer you Natural Timber, DecoWood®, Colorbond® and UniCote® LUX Timbers of the World.

Each offering has different benefits depending on your requirements, while providing the warm and homely charm that a timber look provides.

Our impressive assortment of beautifully crafted options offers a classic and timeless style that evokes a feeling of tradition with a modern twist.

The above is one of our Natural Timber Garage Doors with V joint profile

You dream it, we create it.

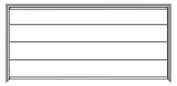

Timber Selection

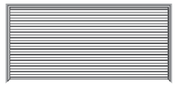

The DecoWood® Garage Door is ideal for coastal properties and bushfire prone areas with its marine grade powder coating. It is made from BlueScope® steel, which is an incredibly versatile material, preferred by builders and designers alike for its strength, durability, flexibility, lightness and corrosion-resistance.

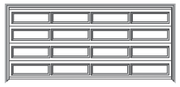

Unlike timber, DecoWood® Garage Doors don't warp, shrink, splinter or rot. They require little maintenance, and they are also completely impervious to termites.

Natural Timber Selection

Stand out from the crowd with a door as unique as you.

As our Timber Garage Doors are custom designed and manufactured, you can rest assured we will create a product to meet your dimensions and requirements. No matter what shape or size your garage is, a Timber Door can be made to suit it - and it will look fantastic.

And because this range is custom-built using natural products, you can look forward to having a truly one-of-a-kind garage door that has its own unique look and character.

The most popular timber used in this range is Western Red Cedar, a lightweight yet solid timber that looks equally beautiful on a renovated or new home being built.

Wind Rated Slimline Sectional Garage Door in Colorbond® Surfmist

Strut-Lock™ Wind Rated Sectional Garage Doors

The Strut-Lock™ Garage Door is post free, incorporating the use of heavy duty struts, robust commercial hinges, top brackets in combination with a unique stile reinforcement to provide maximum resistance to forces exerted by cyclonic and high winds up to 5.5m (also available for C2 & up to N4).

Wind Rated Wind Brace Sectional Garage Doors

The Wind Brace design feature with removable steel wind brace post(s) is installed to the Sectional Garage Door once a cyclone warning is received. It takes about 2-5 minutes to install, and no tools are required. This feature can significantly enhance wind resistance up to C4 wind rating while still ensuring a smooth door operation (also available up to 6m for C2, C3, C4 & up to N6).

Wind Rated Roller Doors

The Wind Rated Roller Doors are designed to provide additional wind resistance in extreme weather conditions. The new Wind Rated Roller Doors have been designed to reduce noise and increase service life. Optimised to suit your requirements, the Wind Rated Roller Doors are suitable for homes, sheds, commercial and industrial warehouses in cyclonic and non-cyclonic areas (C2/N4 up to 5.5m).

Insulation for your Sectional Garage Door

If you're seeking to enhance energy efficiency throughout your home or transform your garage into a home office or gym, consider opting for Mammoth® Modern Insulation for your garage door to support your homes insulation envelope.

A smart choice for energy efficiency and comfort.

With increasing concern for energy conservation, an insulated garage door not only maintains warmth during winter and keeps things cool in summer it also reduces your energy expenses.

Slimline Sectional Garage Door in DecoWood® Silky Oak

Mammoth MODERN INSULATION **benefits**

- Safe and easy to install
- Will not cause irritation when touched
- Does not give off fumes or odours
- Backed by a 50 year manufacturer's warranty
- Assists in absorbing noise to create a quieter environment
- Made in New Zealand
- Eco friendly – made from recycled plastic bottles
- Fully recyclable product
- Fire retardant

Commercial and Industrial Doors

A2000 Hingeway Counterweight Balanced Door

Steel-Line offer a range of commercial and industrial closures in partnership with BX ARCO Australia Door Systems, BX MAX Door Solutions and BX SPRINT Roller Shutters that combine strength and reliability. We offer high quality products, exceptional customer service and real value for money within the commercial and industrial space.

Our products are typically customised to suit project specific criteria. In particular, Roller Shutters and Roller Grilles are usually individually designed to suit architectural, ventilation and aesthetic requirements.

We can assist in all stages of the construction process - from design specifications through to estimating, project management, supervision of the installation and efficient after sales service.

DESIGN YOUR DOOR
SHOPPING GUIDE

Select a door — Create your design — Select a colour — Select your opener and home enhancer's

STEP ONE:
SELECT A DOOR

Using the icon guide at the bottom of each page, select your door type.

SECTIONAL GARAGE DOORS

Make a bold impression with the attractive range of Steel-Line Sectional Garage Doors. Enhance the exterior of your home with a garage door that will complement any style of architecture with a range of door styles and colours to suit the unique characteristics of your home.

ROLLER DOORS

Easy to use and long lasting, our Roller Doors can be made to suit almost any size opening. Combine this with a range of Colorbond® colours and smooth operation, they become true design features of your home.

ALUMINIUM FRAME DOORS

Steel-Line's innovative Custom Collection range of garage doors offers over a hundred different garage doors for you to choose from. You simply look at the façade of your home and decide what style would best suit from our wide range of options.

TILT GARAGE DOORS

Is there a particular style or feature that you have not seen in the huge range of Steel-Line Garage Doors? You may have a specific design feature, profile, colour, style or material in mind, or some physical requirements which a standard garage door cannot satisfy.
A Tilt or Custom Timber Door could be your answer.

STEP TWO:
CREATE YOUR DESIGN

Depending on the door type, now select a profile and/or series.

SECTIONAL GARAGE DOORS

| SELECT A PROFILE AND FINISH TYPE

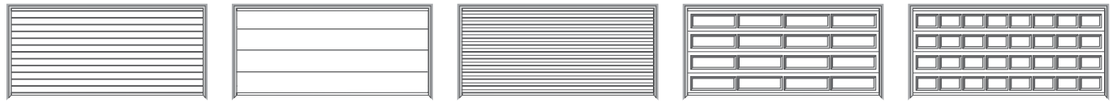

Slimline (SF* or TF)

Flatline (SF* or TF)

Glacier (SF* or TF)

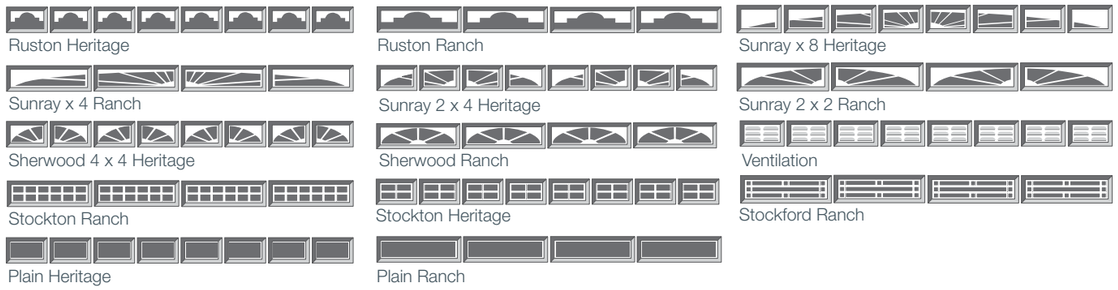

Ranch# (TF)

Heritage# (TF)

TF: Textured finish. SF: Smooth finish (Savannah). # Windows can only be fitted to Ranch or Heritage designs in standard Colorbond® colours.
* Smooth finish (Savannah) is available in the Smooth and Powdercoat range at premium pricing.

- 1 x battery backup unit, 2 x E960G 4 channel keyring transmitters, 1 x E138G wireless wall transmitter
- 2 year, 10000 cycle warranty

HOME ENHANCERS

PE Beams

The PE Beam allows the garage door to automatically reverse when its sensory light beam is broken by an obstruction, helping to protect your family from injury and your car from damage caused by contact.

Available as wireless on all Pro models and wired on all Std models.

E-Lock

The E-Lock enables remote control and status monitoring. When the door is completely closed, the E-Lock automatically locks your garage door.

Available as wireless on all Sectional Pro models and wired on all Sectional Std models.

F-linX Wi-Fi

Control your door from anywhere in the world. Simply connect your Wi-Fi, download the app on your phone and you can check the status of your door, check what percentage it is open and have full control of its operation.

E-Door Connect

The Smarter Garage Door Controller. Unlimited connectivity anywhere and anytime, the E-Door Connect opens up a whole new experience for convenience, safety and accessibility for everyone.

Compatible with the SD1000 Pro, RD1000 Pro and RD1500 Pro.

Brush Seal

A tough and durable Brush Seal can help better protect your garage from the elements and satisfies the “Construction of buildings in bushfire-prone areas” standard AS3959:2018 for protecting against fire embers entering the garage.

Additional Handsets

Key Ring Remote transmitters are small and convenient with the ability to operate up to four doors from one unit.

A must have for every set of keys in the house.

Emergency Key Release

Used in case of malfunction or power failure, especially useful if there is no other access to the garage.

Battery Backup

A Battery Backup provides an energy supply in the event of a power outage, allowing you to continue operating your garage door.

Smart Camera

With 3K HD colour resolution, dual-band Wi-Fi, cloud storage, motion detection, night vision and two way audio with built in speaker and microphone, you can monitor your garage from anywhere in the world for free. Recommended for internal use only.

Available as wired only.

Coastal Upgrade Pack

Sectional Door Upgrade Pack includes Brush Seals, Powdercoated tracks and brackets and stainless steel cables.

Roller Door Upgrade Pack includes Brush Seals, AA Aluminium tracks with the no lock option.

The Coastal Upgrade Packs for both Sectional Doors and Roller Doors are recommended for all doors that are located within 5 kilometres from the sea to offer enhanced protection against the elements.

Wireless Keypad

The Wireless Keypad can be programmed with multiple, unique user codes. It is perfect for the family, tradespeople, or going for a walk. This means you can leave your keys at home with peace of mind.

Insulation

A Mammoth® Insulated Garage Door not only maintains warmth during winter and keeps things cool in summer, but also reduces your energy expenses. For optimal performance we recommend adding brush seals.

Available on all standard Sectional Garage Doors.

Wireless & Automatic

Garage Door E-Lock

- **Easy to Install**: Optional wireless* design means no messy wiring.
- **Remote Control:** Open, close and lock your garage door with the push of a button.
- **Quick & Convenient:** Save time every day with simple, one-touch operation.

*Available as wireless on all Sectional Pro openers and wired on all Sectional Std openers.

How does it work?

The E-Lock automatically locks when you close your garage door using the remote. As the door reaches the closed position, a locking pin slides out to secure it. When you open the door, the pin pulls back, unlocking the door so it can lift smoothly.

Wireless Capability
Available as wireless on select Pro openers and wired on Std openers.

Trio-Frequency Technology
New technology for interference-resistant transmission.

Compatibility
Compatible with all Sectional Door Std and Pro openers.

Hassle-Free
Simple disengagement in the event of a power outage.

Photo Electric Safety PE Beams

- **Smart Detection:** Uses invisible infrared sensors to detect movement in the garage doorway.
- **Automatic Response:** Sends a signal to stop or reverse the door if something crosses the beam.
- **Peace of Mind:** Helps protect cars, bikes, pets and children while the door is closing.

*Available as wireless on all Pro openers and wired on all Std openers.

How does it work?

Steel-Line openers already have auto-reverse built in, but PE Beams add an extra layer of protection. These beams use infrared sensors to detect any obstruction in the path of the closing door. If movement is detected, the system sends a signal to stop or reverse the door, helping to prevent potential damage to vehicles and avoid contact with objects or people in the doorway.

Damage Prevention
Prevents accidental closure on vehicles, tools, or other.

Everyday Convenience
Automatically stops and reverses the door if anything is in its path – perfect for families with kids or pets.

Reliable Technology
Infrared sensors detect movement.

Easy Integration
Compatible with most automatic garage door systems.

STEP FIVE:
SELECT A SERVICE CARE PLAN

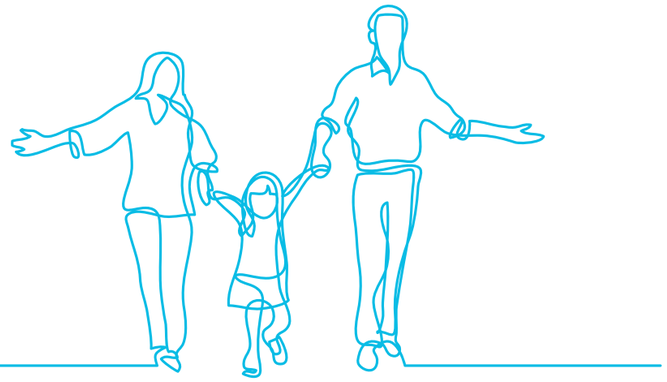

simply safer

Service Care Plan

With a Steel-Line Garage Door Service Plan you can enjoy peace of mind for less with our 3 and 5 year service plans at a much lower cost.

Reassurance will only cost one upfront payment and will ensure your door is always under warranty. Steel-Line Garage Doors has qualified Garage and Roller Door Service Technicians on-hand to service or repair your garage door.

With one upfront payment, you save money and can rest assured your door remains in tip top condition and fullfils your warranty condition to service your door annually.

Steel-Line Door Service Plan Key Benefits:

- Available Australia wide
- Significant savings with one up front payment
- Guarantee your garage door is serviced by Steel-Line qualified technicians
- Assurance your garage door is working in peak condition with regular check ups

3 and 5 year service plans available.

Ask your local branch about how to sign up for a plan today.

Terms and Conditions:
- Service care plan is only available on doors 11 months old or less.
- Parts are not included.
- Only applicable to the doors fitted and is not transferable.
